STAR KITCHEN

**THE ERGONOMIC REVOLUTION
IN YOUR KITCHEN**

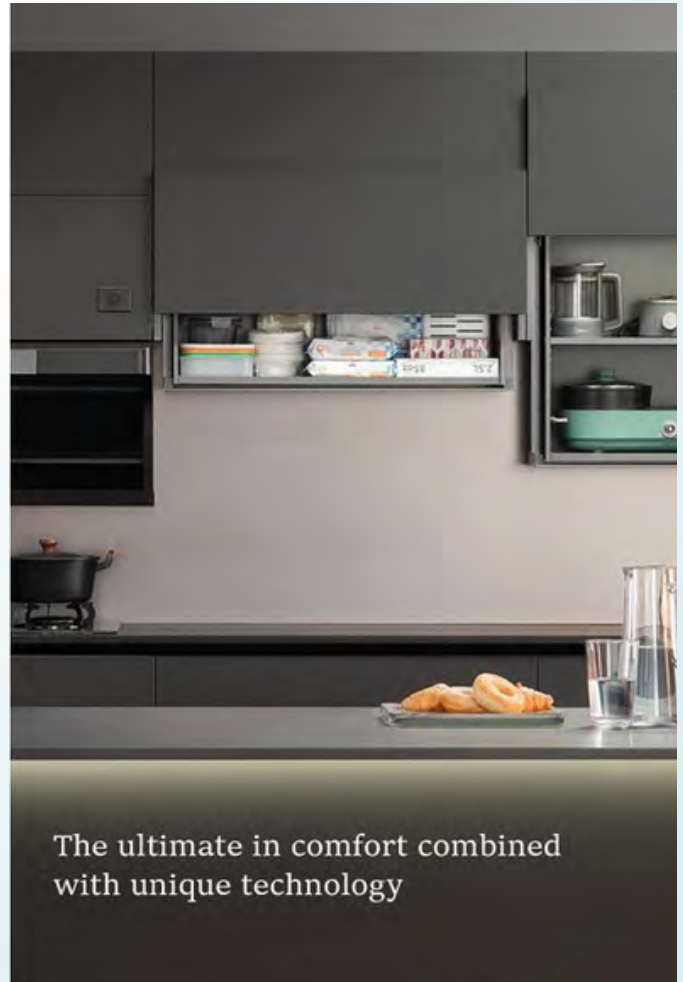

Elegance & Ease of Access

The perfect combination of design and technology for an innovative kitchen that impresses and makes everyday tasks easier. Thanks to the integration of mechanical and electronic components, we created Star Kitchen, a motorized system that rises and lowers gracefully and silently, keeping everything within easy reach.

Motorized wall cabinets offer a modern and functional solution that enhances kitchen design while improving home accessibility, especially for the elderly, people with disabilities, or those with mobility challenges.

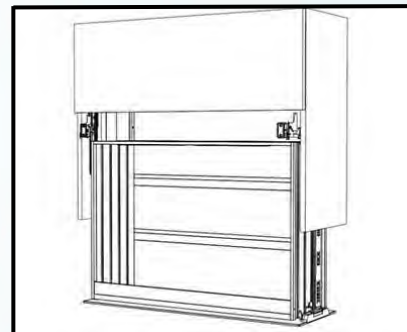

With motorized lift technology, wall cabinets can be lowered safely and effortlessly, allowing anyone to access items stored up high without strain.

Our systems are designed to seamlessly integrate into both modern kitchens and existing setups, featuring cutting-edge design and smart functionality.

- ✓ SMOOTH AND SILENT MOVEMENT
- ✓ CONTROL VIA SWITCH SENSOR
- ✓ COMPATIBILITY WITH STANDARD WALL CABINETS
- ✓ ANTI-COLLISION SENSOR INCLUDED

Technical details

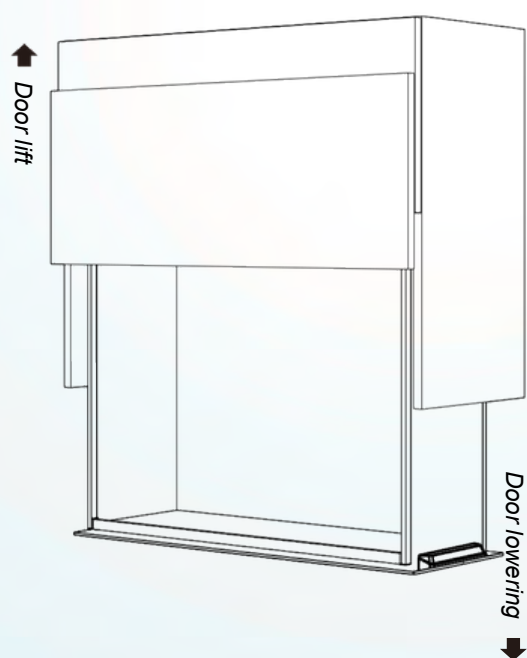

<i>Cod.</i>	<i>External dimensions</i> * for finished wall cabinet	<i>Item description</i>	<i>Color</i>
STK-800	L800xA700xP300mm	Integrated lift mechanism for 800mm module	Dark grey RAL 7016
STK-900	L900xA700xP300mm	Integrated lift mechanism for 900mm module	Dark grey RAL 7016

Cabinet dimensions

Cabinet dimensions

External dimensions of the wall cabinets, including panels up to 18 mm thick

Length (mm)	800	900
Depth (mm)	300	300
Height (mm)	700	

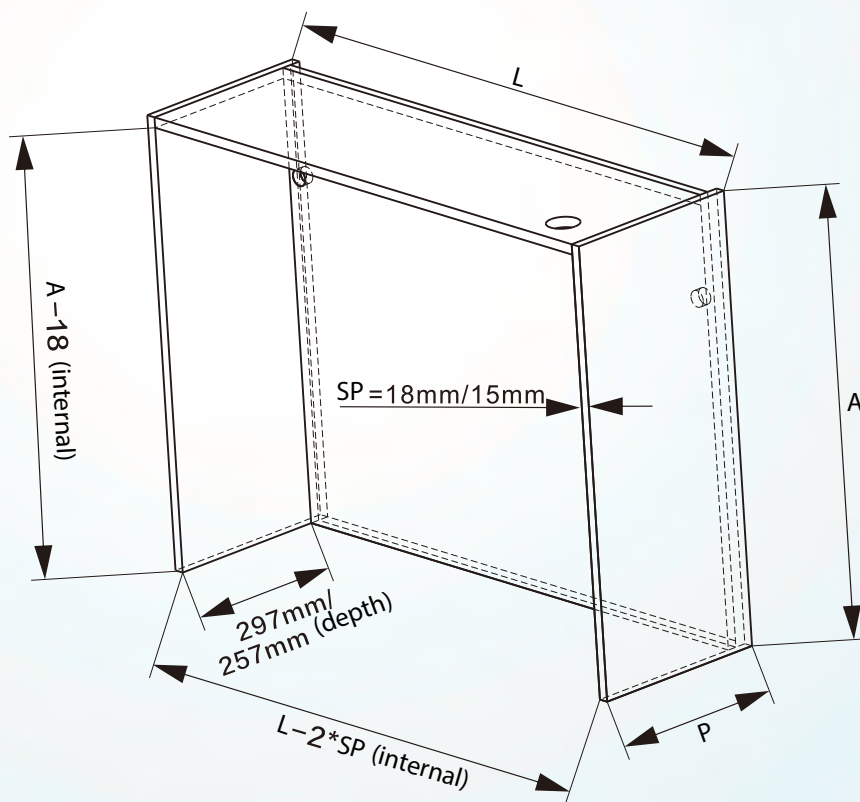

Height cabinet

Height	Door lift	Door lowering	Internal cabinet height
700mm	250mm	300mm	≥ 682

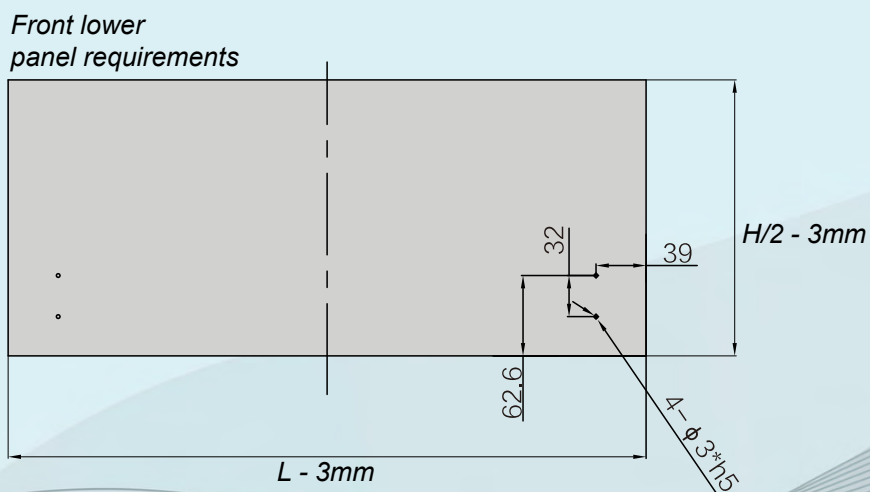

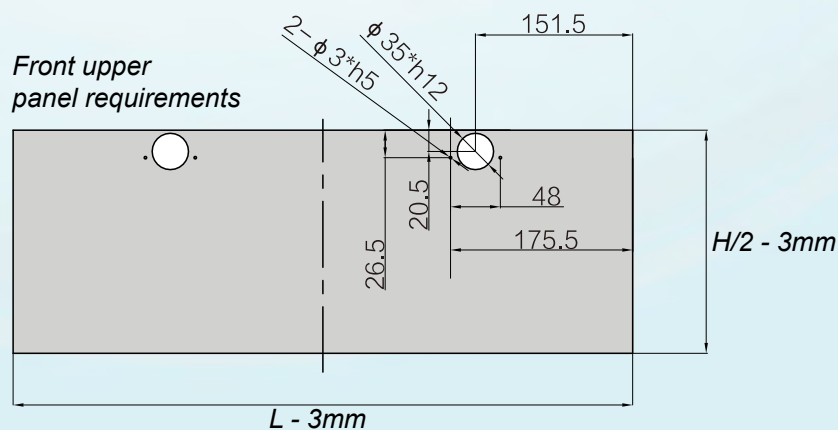

The construction of the wall cabinet must take into account the dimensions indicated for the chosen model. Star Kitchen models are available for 80/90 cm modules with a height of 70 cm and a depth of 30 cm.

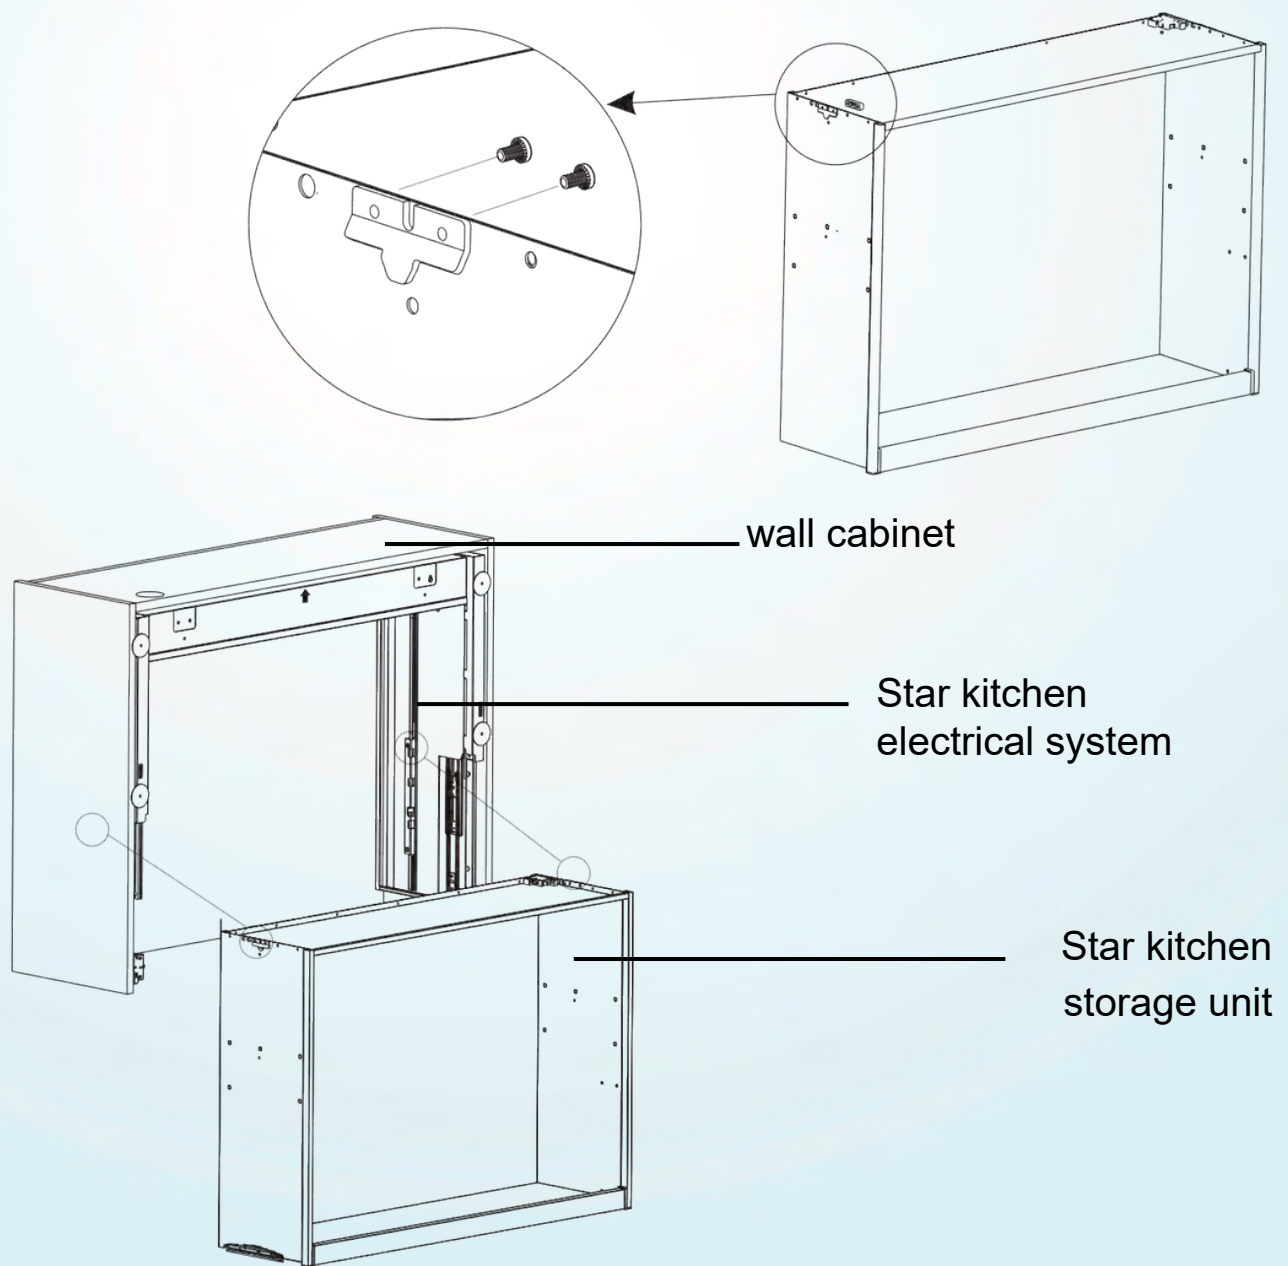

For the assembly of the wall cabinet, the front panel must be divided into two doors, cut along its length. The lower part of each door must be properly attached to the mechanism brackets. In this way, when the mechanism begins the lowering movement, the lower door will automatically lift, ensuring the correct operation of the system.

Wall cabinet construction

* tickness of door panel must be $\leq 22\text{mm}$

The system installation and setup are extremely simple and intuitive, thanks to a design that minimizes the time and effort required. With just a few steps, the mechanism is ready to use, without the need for any complex operations.
